DIGITAL FILE REQUIRMENTS

Image Data Formats:

- * Artwork is preferred as **PRINT READY**, PDF, EPS or Tiffs files. If editing is required we accept native files from layout programs such as Illustrator, In Design, Photoshop and Quark. Please include fonts and supports.
- * PMS colors must be specified pantone coated, do not convert to process. If a color match is required but you do not have a PMS color, please supply a physical color match when submitting your order. Otherwise, we print as is.
- * Please set up all files with bleed, at least 1/8", (or 1/4" on larger images), on all sides.
- * Always include hard copies, with file names and final sizes written on them.

Vector Graphics:

- * Documents should be set-up proportional to the final size, (100%, 50%, 25%, OR 10%).
- * Include all screen and printer fonts used in your document including fonts used in placed EPS files or convert all fonts to outlines.
- * Imported raster images should be placed as an EPS or TIF file in the documents original color mode.
- * If you have a layered Photoshop file, include it with your job.

Raster Graphics:

- * The document should be set-up at 100% of the final size.
- * Resolution should be no less than 100 d.p.i. at the final size.
- * If possible, include all layers in file, do not merge or flatten.
